JUSTRITE

For decades, JustRite self-inking stamps have set the standard when it comes to all-metal custom stamps. Due to their high quality, industrial strength design JustRite stamps can be used in demanding environments, as well as special applications that require highly aggressive inks.

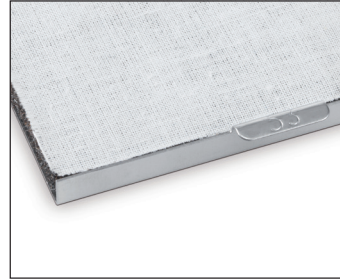

Due to their modular design, Justrite stamps can easily be integrated into specific industrial applications in the production process.

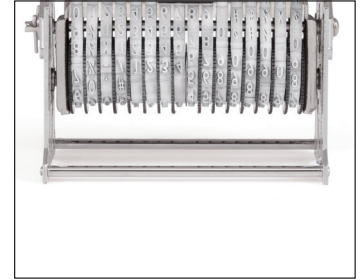

All-metal design for high stress in industrial environments.

Easy integration in industrial applications due to modular design.

Needle felt pad for special or aggressive stamp inks.

Numerous band combinations.

SPECIAL ASSEMBLY. SIMPLIFIED.

Historically, JustRite Dater and Numberer band sizes have been inconsistent with one another. This can lead to confusion and over-complication of the ordering process.

Trodat has worked to eliminate as much complexity from the special assembly process as possible, by harmonizing, streamlining, and simplifying JustRite Dater and Numberer bands into a single, cohesive family of sizes.

A rolling conversion of sizes has been completed, and moving forward all JustRite models will adhere to the new streamlined offering.

The below chart compares the old-style MMC band sizes to the Trodat harmonized family of sizes.

FIGURE & LETTER BAND LAYOUTS FOR HANDSTAMPS

Band Layouts are designated using the first character on that band. For example, in the Figure Bands below, the lefthand band with "1" as the first character is a NO:1 band. The next band over is a NO:2 and so on. This applies to Letter Bands and Cost Selling Bands as well, for both Hand Stamps and Self-Inkers.
